Outro:

Peace to the "Happy Tea" People. We're learning about what's good in the world. The Wellness community loves you. Giving thanks for "Comparison is a thief of joy". We appreciate your thoughts. We realized that there's lots of barriers to entry in the businesses across the globe, and we all help each other. Every effort counts. Whistle while we work. Peace to "Harbottle-Dorr and "Fulton-owsler" (Basically the People who care about stories and value sharing honest History). The spirit of reading stories and books are our friends. We agree what the "great again" destructive mass movement needs is to learn about public service. Maybe start with local government. We learned in Eric Hoffer's book, The True Believer, that philosophy meets the argument underneath every one of us, instead of bickering on the surface, in a sleeper-loop mindset. It irrigates the confusion, and brings peace. In psychology, 'Denial' is what's called a "coping mechanism", whether it's substance abuse or a cult addiction...For example trying to say that an insurrection wasn't an insurrection, is like an addict with excuses. As the saying goes, "you can't kid a kidder". So, let's pray for the spirit of peace, and truth to cover the earth. God bless. Giving thanks for "Dolphins love those ocean waves". A mixed economy is balanced and "reality tends to have a liberal bias". And here's to public service minded national leadership across Nations. Stop the war. Rebuild the villages, concert halls, and stadiums. And good news, trading is not only for geniuses. "Straight through the book". Psalms 45:7. We love peace and righteousness, and reject wickedness. God bless. Here's to the future of the bloodstory miracle. One love. Peace.
