

Peace Team...1-11-25 - Heyyy - Wow! It's 1-11 today! I wrote a hook years ago that said: 'Let's get to 1:11' ---- whatever that meant, or means today :o)
"TeamOne Rhymin for Rapture" spokespeople can explain about the
"HipHopNumerology" phenomenon thing...I share a few "Rhymes for Raps" at the end of this document if U dig...peace.

Ok, now, let's get to the business of nurturing an "Abundance mindset" :o)

Here is a Gold futures strategy working with the Momentum Flow Support indicator "MFS", and Momentum Flow Build Indicator "MFB". (I will explain more as I journal the charts n' stuff – week to week)

This series of charts is a journaling commitment that I am working with, in order to process through ideas into a repeatable strategy, that helps to win Prop Firm evaluation challenges...It starts with identifying 15 minute chart levels, and then trading the MACD signal on the 1 minute charts...For trade management, I have found that using the 30 second chart candles allows me to better see the "Momentum" at work. When a candle closes (or even wicks) beyond the previous candle, then its still viewed as "momentum", and I stay in the trade. The 30 second chart is used as a trade management tool...if price stops at the previous candle close and retraces, I close the trade...Cool...I hope some of the notes on the charts bring U a smile...and, yes, these two examples were winning trades on a Prop Firm evaluation account...Onwards and upwards...peace

A few “Rhymes for Raps” thoughts if U dig....The “Natural Power of Decentralization” is important, because it will usher in the new paradigm shift. A “Wisdom of the Assembly” across Nations, to solve the world’s problems and elevate the consciousness...I talk about it in all the tunes....everyone has a flow, when listening to their peace. We gotta slow the tempo down a bit to catch what the universe (God) is saying...Call it Universe, Law of Attraction, God, or however...something higher is at work...Usually there are universal confirmations, (or God’s talkin) when a person is in a “time flies when your having fun” moment, or a mindfulness moment...it’s a vibe spirit of a “numbers on the clock” God’s talkin’ (call it providence or luck)----a “validation of moments” phenomenon...Anyway...just like the new “Science of Synergetics” conversation, people’s ideas are eternally unfolding as consciousness exists...and an endless deliberation of energy certainly deserves to be expressed. The Synergetics topic calls for a “Decentralized conversation” to realllllly arrive at a truly exponential depth of understanding of the natural science...Why? Because every person has a special contribution to the topic. Just like the “Spiritual Web3” idea...There is a

needed respect though, for Universal and Individual Synergetics topics. Only then, can Synergy ideas teach about life relativities across the Earth, and then arrive at ‘Synergetic understandings’...The word “Relatability” helps...“Relatability” of physical/mental/spiritual synergies are “energetic” links that brings people together. “Synergetic mind melds” are an inspiration, and can bring peace....Everyone has a special pheromone or molecular structure that relates to other individuals and community synergy links...A.I. will completely understand Synergetics when neural networking beings...For now, “Spiritual Web3” is catching a glimpse of the miracle...

I thought it was important to share a few recent thoughts at the end of this Gold Futures Strategy share...The world is mostly rushing to face “cash rules” realities, or consumed with whatever it may be. Life. So, Trading Knowledge Fellowship, and Rhymes for Raps Fellowship is a great way to find Common Ground...**The world needs to learn to heal through processes**, and finding **Common Ground** can always be part of the journey...**Community Rebuilding, Education, Business collaborations, Village Sustainability Projects, and Arts Initiatives** are excellent/necessary mediums to process energy through. The Multi-generational argument of Democracy/Love ----versus--- (yuk)---hate/agitate/lie/deny/divide is not in a 1930’s story loop in 2025. It’s actually more like a “Delaying the inevitable” “don’t look up” type of reconciling moment....Yes Folks, “Reality TV is currently meeting reality”. WWII lessons need to be understood “again”. A demagogue was entertained and condoned. Simple. We learned in WWII, that “Those who do not care for the rights of others, tend to not care for their own.” So, let’s try to bring the political aisles together, in spite of the possible executive branch morning poop “psychological warfare” social media feed tweet distractions...For people who “Don’t care” if an Iron curtain like figure is elected to power, they “will care”, and Iron Curtain survivors are certain about that truth...Look at the moment right before Hitler took power...People didn’t think he would do what he said he would do either...Regardless of the “Emperor Wears no Clothes” fuss we are about to witness “again”....Military Intelligence is staying “Threat informed”, yes, even though “Chaos follows him” will keep trying to erode away at Democracy Freedoms...Let’s “Fight back in the right way”...“Collective Bride Groom” strength, “Mother Hen Collective” Fellowship, and U.C.H.C. – Universal Council for Higher Consciousness. Sincere and Honest

efforts are underway indeed, as usual...the "Peaceful Transfer of Power" (succession principle) and the "Advice and Consent" of Congress must live on...let's never take a day for granted. Take the day for "gratitude"...Sharing thoughts is like "Hugging time" together...We can all be spokespeople in our own way, if we work together and respect..."We are each other". Be safe. Take care. Peace.
