

In trading Gold futures, its important to trade the symbol with the most volume. If a chart looks choppy with price, and candles not full, may have to look up what the new/best symbol is.

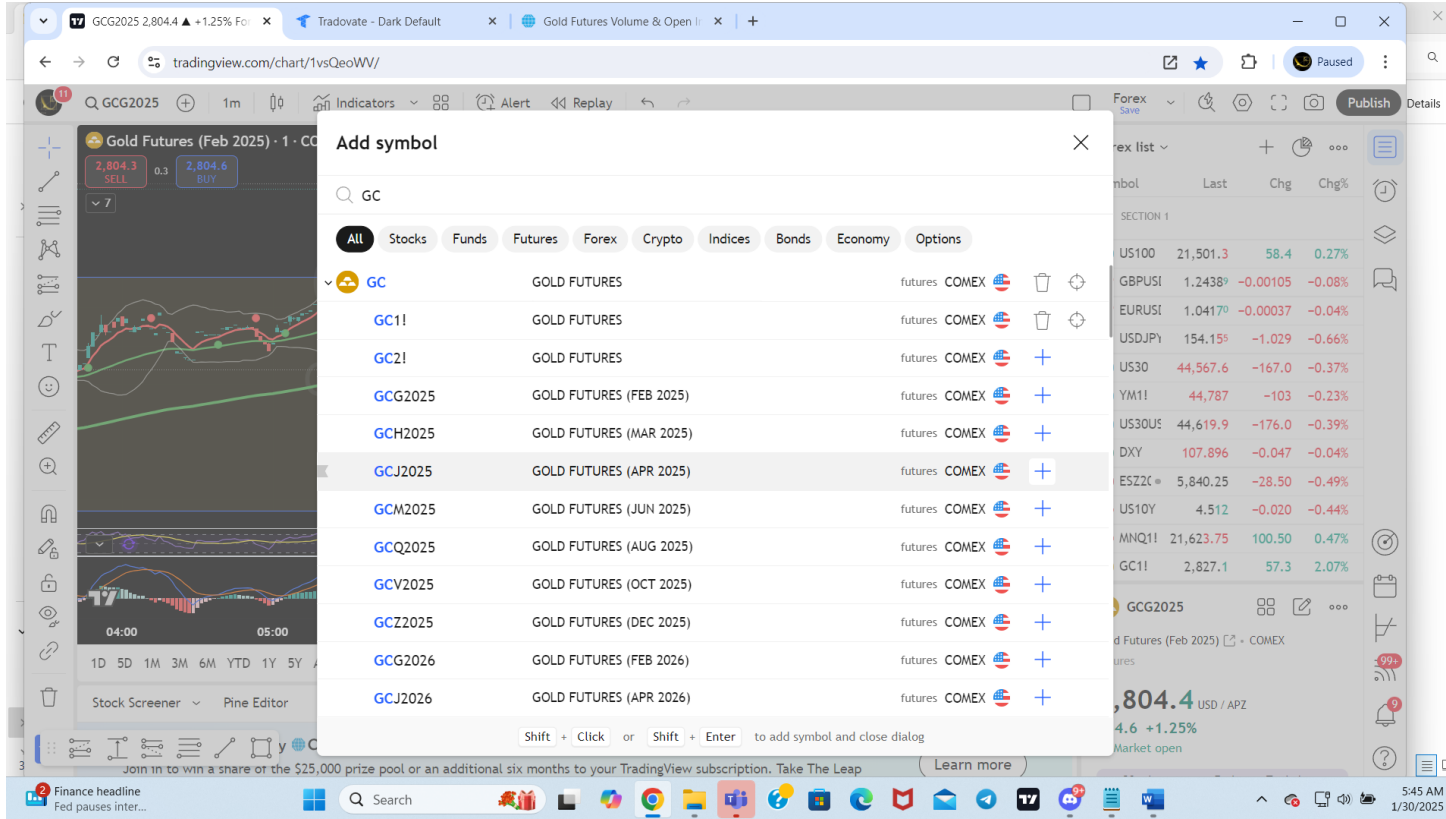

Also, will need to remove the previous symbol in Tradovate, and find the new symbol.

Here is the link to find best volume Gold futures symbol. Copy and paste into the internet browser.

<https://www.cmegroup.com/markets/metals/precious/gold.volume.html>

Here is how to find the symbol in Tradingview – type “GC” then the arrow on the left to find “GCJ2025”

Note how the previous Gold futures symbol is choppy?

Ok....these candles are much better----
