

Peace Team. Here are some charts from the 7-17-25 NY open session.

A reminder.....I am working with “Time Based Liquidity” and Value Areas.

“Areas of Interest” trading considers Key levels including 4 hour, 1 hour and 15 min Fair Value gaps, as well as any “Inflection Points” (an FVG through a structure level).

If price returns to these areas, we watch for a response (Smart Money push).

If price reaches a key level, then how does it respond to the level? Bullish or bearish?

Learning along. Peace.

I guess I did not create a “Closing Remarks” chart. So, I would say “Closing Remarks” on this 7-17-25 session, was that I followed the rules generally and did not enter too many trades. The Teacher took a discretionary trade, yet I did not know why, and it wasn’t my usual strategy, so I did not take it. Cool. Onwards and upwards. Peace.
