

Peace – Giving thanks for the Global Trading Fellowships encouraging people to build and hopefully learn to be successful traders, to create a cash flow stream. Peace

Chart journaling for 2-19-2026 – MNQ – NY session.

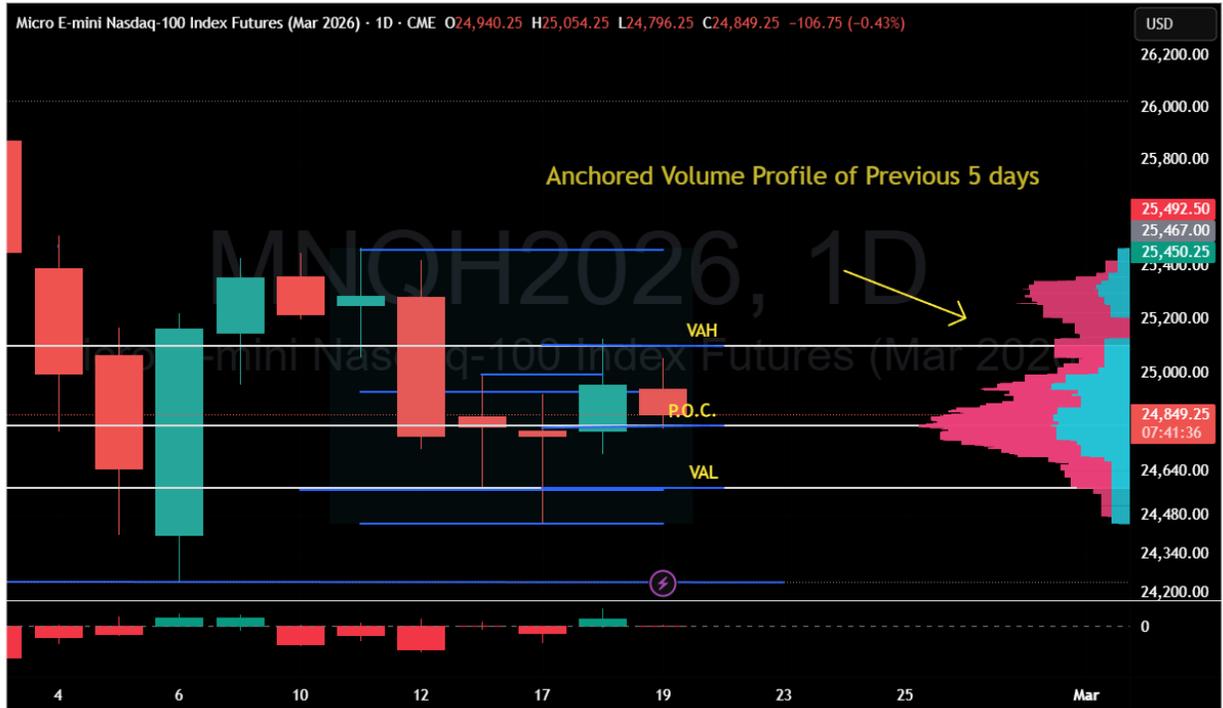

There is a lot of drawing and ideas on the charts, yet the **“Simple Peace” of it all, is that in the near future, the drawings will be automated through an indicator, and even trade entries eventually.**

Meanwhile, the Human experience of “The Time before AI generated trade entry and risk management processes” is underway. I am learning a lot.

I am grateful for this session and shared ideas about how to better avoid early trade entries, as I had a chat with the AI Trade Assistant (“Coach”). Onwards and upwards. Peace.
