

Peace – Here is a PDF of how I am trading on the 1 min chart only with the “Universal MFB – Flow/Sweep/FVG-123 Setup” indicator. The Process is the Peace.

“Long Story Longer”:

Two things happening.

- 1) Key Levels are drawn with the **“Momentum Flow Build w/ FVGs v6 (clean)”** indicator that tells us where the Decision Areas are, or where to read order flow. Key Levels are (the “Stage”) where we read order flow to make trade entry decisions.
- 2) The **“Universal MFB Flow/Sweep/FVG-123 Setup”** indicator tells us what the “Story” is at the Key levels – The order flow is either **“In Agreement”** or **“Balanced”**

In Agreement” is when there are multiple “Ch’d”, or “FVG-123” follow through.

It’s either “Energetic candles” (displacement) or not.

No Displacement – No Trading. We need Energetic Candles to move price.

Here is an example working with what we call “Ch’d”.

“Ch’d” is a combination of “Change of Character” that tells us about structure “trend” shifts (bullish or bearish), and “CISD” (Change in the State of Delivery) tells us about momentum shifts (candle closure above or below a series of sellers/buyers candles).

Here is an example of when “Ch’d” is “In Agreement” (sellers/red “Ch’d”) - it preceded a sellers price move.
