

Peace – Here is a PDF of the most recent two 9:30am EST to 11am EST working with the 15 min Opening Range and Low.

I like to watch the 1 min chart for “Universal MFB Flow/Sweep/FVG-123”, and “MFB – 15 min OR sweep” indicators for buy/sell signals.

In addition, I set alerts for the 5 min chart as well. (“Universal MFB entry”)

Peace.

Note how the VWAP line (blue) was flat today, and the recent buy trade was not a momentum trade (EMAs and VWAP were not at an angle)

The "MFB - Value Acceptance" (lower right corner of the chart) said "Neutral" when the buy trade was signaled. Its always ok to take heed to the "MFB - Value Acceptance" reading on the current market.

It said: "Value is below VWAP" - That tells us about "Value of Average Price"
