

Peace - Today I decided to add the "Intention Dots" to the 1 hour, 30 minute and 15 min charts.

For anyone watching for Higher Time Frame candle closures at London Close (10am EST), or "Initial Balance" (I.B. - 9:30am to 10:30am), or 11am EST, 2pm EST or 3pm EST, this feature should help.

The 1 hour and 30 min chart "Candle closures" are known for its power in predicting Lower Time Frame intentions.

I like the 5 min FVG-123 setup, when there is a 1 hour or 30 min candle closure beyond a key level (or a sweep of a level, and the candle closes back inside the level)

If there is an "Intention Dot" and then no 5 min chart FVG-123 in the closure direction, then no trade.

If price closes back inside the level, then take 5 min FVG-123 setups in that direction. The "Universal MFB..." indicator should signal that "Sweep" opportunity.

An "Intention Dot" prints when there is a candle closure beyond a key level.

Peace.
