

## No Need ta Trrrip

Intro: Peace, it may seem like the raps are no big deal, but we gotta get it off our chests cuz haters hate to no end, and this helps us.

1st Verse:

No need to trip, said my peace button my lip so I can chill nuff said holding it down peace factories

Point made we all have to have our bounderies and keep it for survival ditchin scoundrals frowns casualties

Called em' on it running games got em' right on the nose so we propose a truce loosin' spiritual principalities

Same drama different batch that pushes buttons poppin' greed that can't control itself knowledge saves families

Like Wu don't sugar coat saving grace too many radio rappers with lack of gratitude change the batteries

We'll wake em' up n watch em' run for fun no just a joke theres hope ta stoke so keep tha torch stay the course for galaxies.

Hook: No Need ta trip so don't trip, work with that, don't trip (4 times)

Verse 2:

Scientifics mathematics doin' my best n God the rest 3 worlds collided so watch it  
love that's reality

Hip Hop Jazz Classical for example not emotional tricks n sneaks disguised in  
policies

Passed the politics historical focus please peaks n market drops obvious too many  
young try ta copy G's

Without experience too delirious grimaces born from pain or snorts narcotic think  
they got it psychic things

History of Rap to build on they don't care cuz they don't know pride is one thing  
respect community

WE have to listen denial won't so it's back to zaps n brush the shoulders off peace  
to human G.O.D.'s

It keeps blessings Beez cuttin' through the hate silently pushin' back all the hatin'  
hater enemies

Man of our word that's why we reachin' out n' we can live with that mostly  
scrapin' by but hustlers hustling

**Global hoods within we have the knowledge to heal the world Rock em' sock  
em' he is greater than me Birthin' Killah Beez**

(He is great than me...who..? GOD)

**What did they think that all success and light would end in cans of worms no he'  
really done let it go, listen please**

(they try to open a closed book, can of worms already cooked...put a fork in him, he done...otherwise it's wastin' our time...well some folks make a good living rapping back n forth about it all, but for us it's really a drag to be bothered about something already resolved...there's topics in the world we need to address, if hip-hop is going to be a leader to save the planet? The twin brother inspiration (double) is always a good one to touch on, but for hope and whatever suits the rapper, but give us a break...and the comparison thang gets real oblivious sometimes...it's about one love...that's what we will leave behind...respect)

Hook: No Need ta trip so don't trip, work with that, don't trip (4 times)

Outro:

Leave a bit of hope behind, God moves closer to the industry, Prioritize and time budget, and get back to you, Not all the rap hype dwells and gossips for close knit industry awards that feed on a lost soul mentality, yeah, we know, lost souls is one thing, spark some hope and peace in the community, it's about God, and they can take that to bed, life or death, we choose that. Peace.
